THE PREPARATION

1 WEST EAST 5:48

There is no difference.

In terms of culture, religion/belief, race, geography and social status - humanity is diverse. Nonetheless we are ALL ONE, connected by the consciousness of life - we are alive... life is the greatest mystery of all. What is life?

This piece blends classical Eastern instrumentation with modern Western musical instruments and styles, and symbolises the above reality.

2 RELATIVITY 4:25

This World. This Millennia.

Performing, proving, achieving, surviving - finding personal space, finding peace, becoming an 'observer' - then pacing, competing, proving, impressing, 'looking good', running, sprinting, falling, rising, learning, growing...

3 HOMO SAPIEN 6:01

Who am I, the sense of being 'I', I experience this world through my perceptions, I am I, what is that 'I', does 'I' go away, does 'I' extinguish with the body, does the 'I' really need to fear death...

4 ARK 8:19

A device common to a number of religions. The Ark of the Covenant housed Divine Energy. It was a fundamental component of a deeper spiritual science - long since lost - and forgotten.

5 TIME OF THE REFLECTION 3:58

6 SITES SIGHTS SIGNS 4:56

Ancient structures, 'significant' locations, mathematics, alignments, size/magnitude, symbolism, protective forces, impossible dimensions, impossible weights, esoteric wisdom - mystical constructs - geometry, portals, far memory.

7 THE LIFE FORCE 7:45

The four distinct musical sections in this piece represent the four planes of consciousness in the physical realm i.e. the material, vegetable, animal and human.

To move beyond these and to experience anything other than the mundane - then the 'other than the mundane' needs to intervene.

As long as consciousness is locked into this three-dimensional 'space sense', then that is where we act from. We have no other reference point. The mystical experience of spiritual awakening is one of connecting to a reality beyond this mundane existential reality.

Thus is the blessed nature of the Human Being - who can connect in a very real and transformative fashion. This connection has different guises and names - and is often within the auspices of a particular religion. Yet the significance of this awakening cannot be underestimated.

MANNED PROBE TO CANUS MAJOR (SYRIUS C)

The myth is ancient. The myth pertains to planet Earth having a visitation from an extraterrestrial amphibious species many thousands of years ago. The species were spiritually and intellectually evolved - and imparted great wisdom and learnings to Homo Sapien. The myth seemingly has substance; the pictorial depiction of amphibian gods and goddesses in ancient sites is widespread.

The next four pieces are symbolic of our spiritual quest, and describe the first manned physical mission to the fabled home of these beings, a remote planet orbiting Sirius C - a small star which is part of the Canus Major constellation.

The brightest star in the night sky, the North Star (Sirius), is also part of this constellation.

This is set in the future, mankind has evolved and we can now cross vast intergalactic distances.

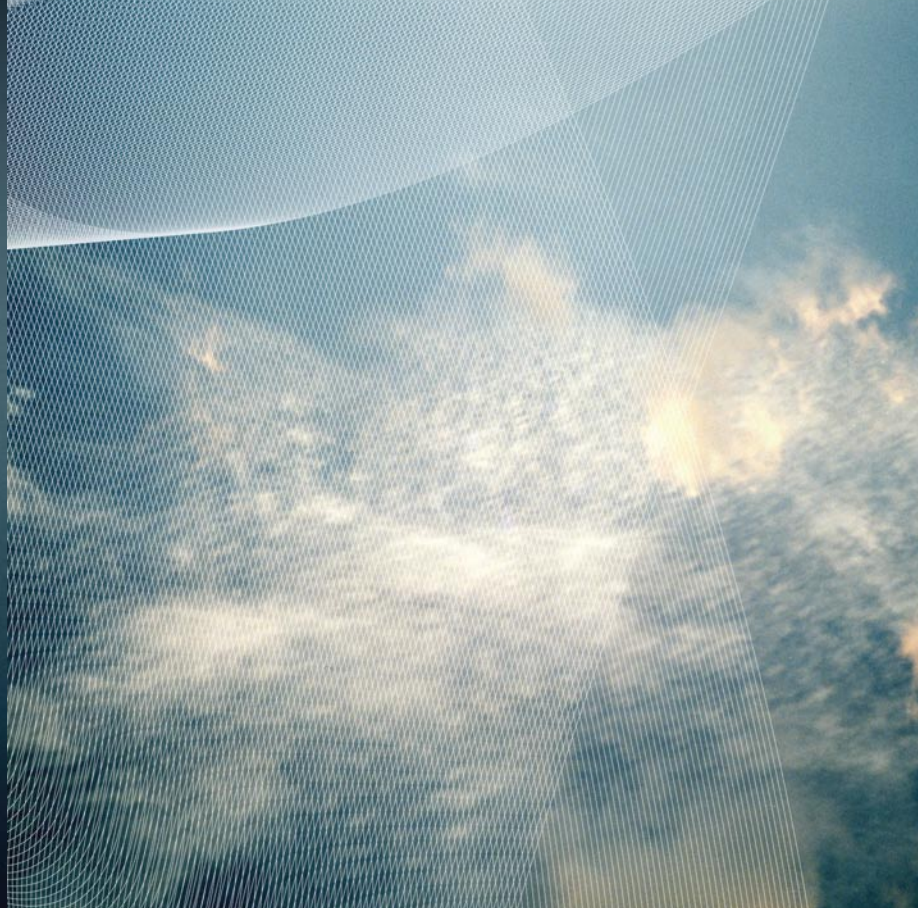

Along the way we came to realise that there was truth to these ancient tales and we were summoned, perhaps ready to yet again physically meet with this mythical ancient race - who in pre-history helped mankind to stand on their feet.

8 THE ARRIVAL - STARSHIP SET DOWN
THE GREETING - THE AMPHIBIANS
THE INITIATION - THE SCIENCE OF GOD 7:57

9 THE TEMPLES 5:32

10 THE DEPARTURE 3:50

11 THE CELEBRATION 6:04

Now knowing what freedom from identification with the body means, we have left Canus Major with the understanding that:

- a. Homo Sapien consciousness predominantly resides in the dream like nature of the material plane.
- b. This material plane appears real because of perceptions entering the physical brain via the five senses.
- c. This perception information is passed to, and assembled, in the cerebral cortex.
- d. Our physical brain is merely a tool - it passes away with the body .
- e. We also understand that, albeit illusory, the material plane does indeed exist, and that it is part of the Divine evolutionary system for life.
- f. Indeed, we now understand that the material plane HAS TO EXIST in order that the Divine can manifest in all levels of consciousness. Nonetheless, in the grander Divine Scheme, it is dream like and illusional.
- g. There is a 'Creator', a supreme intelligence / consciousness that is all-pervasive and all-knowing.
- h. The Great Messengers, Prophets, Ascetics, Saints and Sages of former times were connected to this consciousness, and were always selflessly helping humanity.
- i. 'Everything' is connected.
- j. God is actually closer to us than we ever realised.
- k. Everything we do, for better or for worse, is recorded.
- l. Mankind's divisiveness is on one hand due to his ignorance, selfishness, and flawed character, yet on the other hand there is a 'reason' for everything.
- m. The trials and tribulations we go through, both individually and as a species, are part of a phenomenal and sublime process – a Divine Plan for the evolution of the individual soul.
- n. There is no such thing as non-existence after death - after the body passes away, we move on to have other experiences.
- o. In fact, now that we are spiritually initiated, we are 'open' to the inner planes - and through deep mystical meditation we understand that when we die we actually 'wake up'.
- p. It was the 'body consciousness' i.e. the identification with the body, and the consequent unawareness of the inner spiritual realities, dimensions and realms - that separated us from true wisdom and knowledge i.e. the actual personal experience that the 'Kingdom Of God Lies Within', that WE ARE DIVINE.
- q. The Creative Energy that binds all creation together, physical and spiritual - is none other than that of Pure Love.

12 AMPLITUDE 8:16

Now experiencing the enormity of the real 'I', the Mystic - the Initiate - has come to the end of his/her journey.

Yet the paradox is that the journey is a continuum, there is no beginning and there is no end, just a state of unified consciousness. A state of being where we retain our own identity - yet exist in a state of perpetual bliss - part of the Mind and Will of the One God.
